

CASE: Assisting multiple firms with ML Platform evaluation and AI Strategy. Assist in identifying the best Platform to enable multi-party ML development. ML & AI are coupled together without really understanding how they fit and need to be leveraged for their growth. We have helped multiple firms evaluate and decide the best fit Platform for their strategy & use-cases. This involves looking at different scenarios including IP ownership, third party risk, governance, security etc. Our Evaluation framework & criteria is core to these engagements and we provide industry insights with the evaluation

Included:

- Recommending operational modifications to adapt to the new strategy
- Monitoring partnership, AI platform usage and Capital driven milestones

Included:

- Developing key pillars of AI strategy including data, monetization, cost benchmark & partnership.
- Creating scoring index & enabling scenario modeling

Included:

- Assembling JV structure and investment source (if needed)
- Enabling contract risk mitigation with technological milestones
- Driving additional capital investment & participation for growth

Included:

- Developing DDQ & Fit Analysis for AI platforms
- Carrying out analysis, negotiations and partnership discussions
- Finalizing target and identifying risk mitigation approach.

Bringing it all together: We have assisted clients in establishing a baseline of their current AI state, developing a cohesive AI strategy, identifying the need (internal & external) and possible partners and vendors. Developed target firms, performed requisite DDQ, established KPI's and partnership structure. In addition, developed the post transaction execution plan, milestone monitoring and operational enhancements.
